

Advanced fire protection systems with CE, LPCB, EN 54 and UL certifications

From a 30-year Taiwan-based manufacturer

A selection of our fire protection systems

Meeting the safety regulations of major markets

With 30 years of experience as a manufacturer, we know what it takes to deliver you reliable smoke, heat, gas and flame detectors. We put our products through extensive burn-in tests, supervised by experienced engineers and technicians. And with CE, LPCB, EN 54 and UL certifications, these items also meet the safety regulations of major markets – streamlining the importing process and taking the hassle out of international sourcing.

Our latest analogue fire alarm control panel

Our featured product is a good example of the advanced safety equipment we produce. This fire alarm master-control module can connect up to 2,000 addressable devices. It also complies with EN 54 Part 2 and Part 4. Plus, it's available in four-, eight- and 32-zone models, so no matter whether your customers want to protect large or small areas, you'll have something to offer them.
